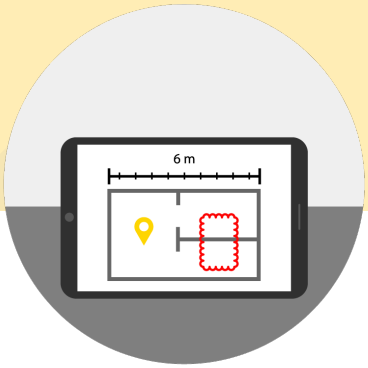
Kops
Construction Cloud

Bridging field and office has never been easier.

A comprehensive, easy-to-use construction management and collaboration software.

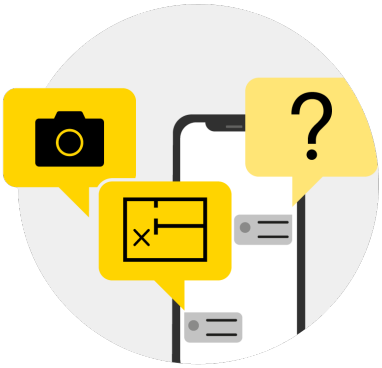
A Mobile App for the Job site

Collaborate and communicate in real time, from anywhere. Project docs and tasks at your fingertips.



Blueprints at your fingertips

View, mark up and measure directly in the app. Tag issues, RFIs and notify others in real time.



Seamless communication

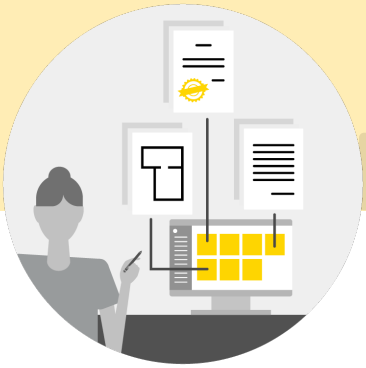
Submit RFIs and assign issues & tasks with photo and video. Keep others in the loop with notifications.

Smart daily reports

Automate information and improve traceability. Reports are instantly filed in the cloud, organized per project and date.

Dashboards for Project Management

A central hub for stakeholder communication, information flows and progress tracking.



Robust document management

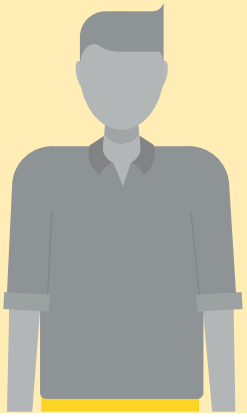
Centralize and share all project documents, from submittals to closeout.

Cloud collaboration

Enhance team productivity via notifications and real time access to information and communication history.

Simplified progress tracking

A unique system that tracks progress by area, phase or contract. Make informed decisions for a timely project closeout.



TETRA TECH

Eduardo LeonBolanos
Site supervisor

"The app saves us lots of time, makes us more effective on site and keeps all the information well organized and centralized so project managers and directors can easily access it."

BBA

Patrick Pilote
Construction System Analyst

"I'm giving a global A+ to K-Ops. After evaluating many different solutions on the market, we concluded that K-Ops has more features and value to offer than others."
