

THE  
BENEFIT  
CODE

# Welcome to a new era of employee health benefits

---

The Benefit Code offers a boutique broker experience that provides innovative health insurance solutions to improve employee health—and save your company time and money.

Through data-driven insights into your employees' needs, we enable you to create a wellness-focused corporate culture. Then, we help you to optimize your health insurance plans to get more for less.

# The Benefit Code puts HEALTH back into health benefits.

## What you get with The Benefit Code:

An employee benefits brokerage

Data analysis to optimize employee well-being

Same-day response time to inquiries

Customized health plans specific to your organization

Modern and customized employee communications

A true partner in employee health optimization

Long-term cost savings (average 20 per cent)

Free wellness programs

A health insurance broker that puts people first

## ASK US GENETIC TESTING:

The Benefit Code offers DNA Testing to reveal the most effective ways to manage your health and wellness. This includes Medcheck, which determines which drugs are effective with specific genetic codes.

Many prescription drugs involve trial and error. With genetic testing, patients know immediately which drugs will be effective. This creates incredible cost savings in negating ineffective prescriptions, while dramatically reducing time away from work for short-term disability. Best of all, it helps employees and their family members optimize their health.
