

Profile

Highly motivated and creative recent **Graduate of Architecture and Urbanism**, minor in Interior Design, with over 3 years of experience in architectural design and technical drawings using Revit and AutoCAD. Currently conducting self-directed training to become knowledgeable with Canadian architecture and interior design practices. Ready to launch a career in Canada with a solid foundation in both fields. Experienced in collaborating with architects, engineers, and technologists throughout all project phases, from concept to completion. Skilled in preparing construction drawings and documentation for residential and commercial projects, while managing multiple tasks and working effectively under pressure.

Highlight of Candidacy

- Expertise in creating building information models (BIM).
- Advanced user of Revit and Archicad software, to provide digital representations of projects (residential and commercial), preliminary concept design, construction documentation drawings and detailing, specifications, cost estimates and quantities of material estimates.
- Consistent, dependable and accurate in carrying out responsibilities to a successful conclusion.
- Self-starter with a demonstrated high level of initiative.
- Works effectively to build relationships with people at all levels.
- Maintains composure and remains positive under pressure.
- Adapts to rapidly changing environment and priorities.
- Well-known to be a detail-oriented individual, and a flexible and reliable employee.

Educational Background

Bachelor Degree in Architecture and Urbanism

Federal University of Bahia (UFBA), Salvador, Brazil, 2023

- Architecture Project 1: Residential Projects - Housing, Technical; Architecture Project 2: Commercial and Institutional Projects; Architecture Project 3: Residential – Apartments Buildings.
- Technical Drawing and Documentation I&II, Building Information Modeling (BIM) - Development, Integration and Project Coordination; Structural Systems I &II & III, Construction Methods I & II, Materials I & II

Diploma in Interior Design

Paulista University (UNIP), Salvador, Brazil, 2021

Professional Experience

Self-employed Architect/ Junior Architect/ Architectural Technologist/ Designer

Carolle Teixeira | Arq & Int - Salvador, Brazil

Jun 2023 – Current

Milcent Arquitetura - Salvador, Brazil

Jul 2023 – Mar 2024

Tatiana Castro | Arquitetura e Interiores - Salvador, Brazil

Jul 2021 – Feb 2023

BAC Studio - Salvador, Brazil

Feb 2021 – Jul 2021

- Developed architectural designs for residential and commercial projects.
- Produced technical drawings and construction detailing for more than 40 projects, including high end luxury residential projects.
- Worked in the elaboration of construction documentation preparation, ensuring compliance with building codes, by-laws,

technical requirements and the permitting process, facilitating successful project approvals and timelines for new construction and renovation.

- Created detailed floor plans and drawings to communicate the layout to clients, contractors, and suppliers.
- Selected and specified materials, finishes, textiles, and colors that align with the design concept and the client's budget.
- Finalize the design with appropriate decor, accessories, and artworks to complete the look and feel of the space.
- Created construction details for carpentry, tiles and stones (countertop, window and door sill, niche, etc) designs.
- Assisted in coordinating with other disciplines on multidisciplinary projects to ensure compatibility.
- Conducted design review and verification to ensure all drawings met project specifications and standards.
- Elaborated the projects materials quantitative (tiles, flooring, furniture, and finishings in general) and estimates.
- Created 3D models and renderings for interior and exterior architectural visualizations.
- Contributed to the transition from CAD to BIM systems for improved design efficiency and accuracy.
- Prepared proposals, contracts and presentations, meet with clients to discuss their vision, needs, and budget for projects, provide clients with updates throughout the design process and make necessary adjustments to meet client needs. At project completion, follow up with clients to ensure their satisfaction and address any issues.

Accomplishments:

- Developed an effective system to organize and detail the interior design technical drawings, which was adopted as a reference by two companies.
- Successfully managed the development of a commercial project during my graduation, overseeing the team and contributing to the achievement of a high-quality outcome.

Skills and Attributes

Professional Development

Self-directed Learning – Hotmart, 2023 - 2024

An In-Depth Immersion into North American architecture and interior design (Canada and United States)

Program Overview: Technical Drawings and Documentation, The Imperial System, Architecture Project: Residential, Commercial and Institutional projects, Structural Systems: Wood frame, Construction Methods and materials, Building codes and by-laws.

Self Directed Online learning - Hotmart

- Revit + Twinmotion for architectural projects (80 hours)

Graphisoft Learn

- Archicad 25 Essentials (32 hours)

Universidade Federal da Bahia - Brazil

- Workshop: The process of BIM integration for architectural projects (30 hours)

Escola Tecnica Leiaut Carielo - Brazil

- Revit Basics (20 hours)

Architecture & Design Software

Revit, AutoCAD, SketchUp, Archicad, Twinmotion, Corona Renderer, 3DS Max, Lumion, Photoshop

Office Tools

MS Office, Excel, Word, MS Outlook, Internet Explorer, MS PowerPoint.

Language Skills

English (Intermediate / Advanced Proficiency), Portuguese (Native)
