

SYLVAIN DONGMO WAMBA

Ottawa, Ontario | +1 613 612 5705 | wambasylvain40@gmail.com

PROFESSIONAL PROFILE

Project Coordinator and Site Supervisor with over five years of experience overseeing infrastructure projects, including long-span structures (up to 50 metres) directly transferable to the precision requirements of railway structures. Proven experience leading teams of 10 to 60 people, coordinating multiple trades, and enforcing rigorous quality and schedule control.

- Strong background in design and space planning within collaborative environments, with a focus on creating functional and aesthetic spaces.
- Proficient in CAD software with solid knowledge of building codes and regulations.
- Seeking a transition into a new field, bringing an adaptable and creative approach to new challenges.

SKILLS

- CAD software: AutoCAD, ArchiCAD
- Cost estimating
- Use of construction tools (power saw, pressure hammer, etc.)
- Project types: Residential, Schools, Public buildings, Commercial, Roads, Bridges and pavement
- Construction: Site coordination, Quality control, Inspection
- Work planning and subcontractor coordination
- Application of occupational health and safety (OHS) standards on site
- Supervision of long-span structures (up to 50 m) — skills transferable to railway structures
- Bilingual communication (French, English)
- Professional skills: Leadership, Communication, Team management

PROFESSIONAL EXPERIENCE

Project Coordinator — Ministère des Travaux Publics

December 2021 – December 2025

- Coordinated road and structural projects, including standard-span bridges (7 to 10 metres) and long-span bridges (50 metres)
- Interpreted and worked from technical drawings
- Supervised teams of up to 60 people across multiple simultaneous work sites
- Monitored work progress, coordinated subcontractors, and controlled technical compliance with plans and specifications
- Applied on-site safety protocols and managed equipment logistics
- Produced weekly and monthly site progress reports
- Identified and diagnosed potential safety risks across the various trades on site
- Fostered team spirit and collaboration

Site Supervisor — Génie Building

September 2019 – July 2022

- Coordinated the construction of large water reservoirs (water tanks) with a capacity of 40,000 litres
- Supervised teams of more than 40 people
- Controlled quality and adherence to construction schedules
- Produced as-built drawings during and at the end of the project
- Set monthly objectives in line with the pre-established schedule
- Supervised the various subcontractors present on site
- Participated in site meetings
- Fostered team spirit and collaboration

- Strong ability to learn and adapt to new situations

EDUCATION

Bachelor of Science in Civil Engineering

July 2021

Université de Dschang, Cameroon

Higher Technician's Certificate: Building Construction — WES-equivalent 2-Year Diploma in Civil Engineering

July 2019

Université de Dschang – Higher Technical Training College

2026 CERTIFICATIONS

- Preparing for the Project Management Professional (PMP) Certification
- PAMCI Training Completion Certificate — August 2026 to October 2026, in progress
- Aerial Work Platform and Working at Heights
- OHS and WHMIS
- CPR / First Aid
- Bridge to Construction Management (BCM) Certificate — Seneca Polytechnic, in partnership with YMCA Toronto, 2026

LANGUAGES

- English — Full professional proficiency
- French — Professional working proficiency
